Aim:
Journal of Eta Maritime Science (JEMS) aims to encourage and publish research studies about the challenges and opportunities associated with considerable numbers of understandings in the maritime sector. Besides, JEMS also aims to reach out to relevant audiences by publishing the latest scientific and technological developments. JEMS journal, which is published periodically and regularly in March, June, September, December, may also publish special issues related to the selected topics.

Scope:

JEMS is indexed in Web of Science Emerging Sources Citation Index (ESCI), TRID, Tubitak Ulakbim Science Database, Index Copernicus International, Directory of Open Access Journals (DOAJ), EBSCO and J-Gate.

Publisher:
Galenos Publishing House

Publication Charges
There are no submission fees, publication fees or page charges for this journal.

JEMS Article Submission Policy:
1. Submission of an article implies that the manuscript described has not been published previously in any journals or a conference paper with a DOI number.
2. Submitted articles should be original research papers about any marine related matter.
3. It will not be published elsewhere in English, in Turkish or in any other language, without the written consent of the copyright holder.
4. Articles must be written in proper English.
5. It is essential that the submission file be saved in the valid format of the template of the word processor used.
6. References of information must be indicated.
7. Source files of figures, tables and text graphics should be inserted in the system separately during the application process.
8. To avoid unnecessary errors, you are strongly advised to use the "spell-check" and "grammar-check" functions of your word processor.
9. JEMS operates the article evaluation process with a "double-blind" peer review policy. This means that the reviewers of the paper will not get to know the author’s identity (s), and the author(s) will not get to know the reviewer's identity.
10. Editor(s) will decide whether the submissions are eligible for publication in accordance with the reviewers’ reports.
11. Authors are obliged to comply with the JEMS Submission Policy.
12. JEMS will be published quarterly.
13. JEMS does not charge any article submission or processing charges.
14. JEMS's peer review process is described as follows. The average time for the first loop of the review process is approximately 8 weeks, with a maximum of three months.
Plagiarism Policy

Plagiarism can take place in two forms:
1. Author(s) deliberately copy someone else’s work and claim it as their own work.
2. Author(s) copy their own previously published material either in whole or in part without providing appropriate references called "self-plagiarism" or "duplicate publication."

Every manuscript submitted for publication to JEMS is checked for plagiarism after submission and before being sent to the reviewer for evaluation. "iThenticate" is used to detect instances of overlapping and similar text in the submitted manuscript.

Advertisement Policy

1. All advertisements depend on the approval of the Publisher or Editor.
2. Scientific content and decisions made by the editorial board have not been affected by advertising.
3. Advertisements are separate from scientific content.
4. Sales and marketing of the products within the accepted advertising are unfeasible.
5. The editor or publisher of the journal is not responsible for the advertisement and its content. This responsibility entirely belongs to the owner of advertising.
6. Accepted advertisements can be placed on any page approved by the editor or publisher.
7. Advertising is done according to the contract between the advertising company and journal management.
8. Advertising content has not included any distinction of language, religion, race, gender, age, disability, etc.
9. Advertising that is contrary to society and publication ethics must not be published.
10. Advertising produced according to national rules and fulfilling their obligations, such as licenses, are accepted for publishing.
11. Advertisements must be prepared in accordance with competition laws and other relevant regulations.
12. Journal management shall not be liable for pecuniary loss due to errors in the advertising content.

Open Access and CC Licence

JEMS is an open-access journal. The term open access gives the right of readers to read, download, distribute, copy, print, search, or link to the full texts of the articles free of charge. JEMS also signed (http://www.budapestopenaccessinitiative.org/list_signatures) Budapest Open Access Initiative (BOAI). According to BOAI (Budapest Open Access Initiative); By "open access" to peer-reviewed research literature, its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The author(s) and the copyright holder(s) grant(s) to all users free access to articles.

Digital Archiving And Preservation Policy

Digital preservation is a set of processes and activities that ensure the retrieval and distribution of information now available in digital formats to guarantee long-term, perpetual access. The preservation policy includes the following measures:

Website archiving

All of the electronic content (website, manuscript, etc.) is stored in three different sources. Content on a server is online and accessible to readers. A copy of the same content is preserved as a backup on two other sources. Should a server fail, other resources can be brought online, and the website is expected to be available in 24-36 hours.

Abstracting/Indexing services

Our journal’s Abstracting/Indexing services store essential information about articles. In addition, some of our journals’ Abstracting/Indexing services archive metadata about the article and electronic versions of the articles. In this way, copies of articles are presented to the scientific community through these systems as an alternative to journals.

Cessation of publication

If a journal must stop publishing, the articles will remain online and accessible to readers through third parties and archiving processes such as those described above. Content can be accessed through PORTICO when required under certain circumstances, such as when the collection is stopped.
Abstract

This sample includes the manuscript preparation guideline of Journal of ETA Maritime Science (JEMS). In the abstract section, a brief indicating the novelty and main findings of the study should be written. The text of the abstract should be written fully justified, in italics and 10 pt. The section should be no more than 200 words. The number of keywords should be between 3-5.

Keywords: JEMS, Author, Manuscript, Guide

1. Introduction

Journal of ETA Maritime Science (JEMS) aims to encourage and publish research studies about the challenges and opportunities associated with considerable numbers of understandings in the maritime sector. Besides, JEMS also aims to reach out to relevant audiences by publishing the latest scientific and technological developments. JEMS journal, which is published periodically and regularly, may also publish special issues related to the selected topics. Scope of the journal covers national, international and local studies regarding Marine Engineering, Maritime Transportation Engineering, Naval Architecture Engineering, Marine Operations, Logistics, Logistics Engineering, Maritime History, Coastal Engineering, Marine Pollution and Environment, Fishing and Fisheries Technology, Shipbuilding and Ocean Engineering.

2. Page Layout and Format

JEMS publishes studies conducted in English. Text is to be prepared with justified alignment, without indentation in the paragraph beginning, in "Cambria" format with 10-point font size and 1.0 line-spacing. There must be initially 6nk and then 3nk line spacing between the new launching paragraph and the previous paragraph. Worksheets must be on A4 paper size, and margins should be 4 cm from the top, 4 cm from the bottom, 4 cm from left and 3.5 cm from right.

Studies must be submitted online from the journal’s web address (http://www.jemsjournal.org). Articles printed or within CD, articles submitted by mail, fax etc., is not acceptable.

The main title of the article must be written in English and should be set centered in 12 point-size. Initially, 6nk and after 6nk space should be left before the main title.

The first letter of the primary headings in the article should be capital letters. All headings and sub-headings should be designed 10 pt, bold and located to the left with numbering, and also navy blue color should be used for sub-headings.

The use of tables and figures should be kept to a minimum. For readability purposes, the total number of tables and figures should be no more than 10 per article.

1 OrcaFlex Program

1.1 Axis Team

The table heading should be placed above the table. The figure heading should be placed below the figure. 2 nk spaces should be added before the table heading and figure heading, and also 3 nk spaces should be added next. The “table” and the “figure” should be written in bold and left-aligned. The first letters of the table, figure and equation headings should be written with "Cambria" font and 10-point size. Suppose tables, figures and equations in the study are cited. In that case, their references should be stated. 2 nk spaces should be added before references, and 3 nk spaces should be added after. If tables and figures don't fit into a single column, they should be designed to include two columns. Tables and figures which include two columns should be stated at the top or bottom of the page.

<table>
<thead>
<tr>
<th>Table 1. Sample Table</th>

</tr>
<tr>
<td>16-24 Ages Group</td>
</tr>
<tr>
<td>25-44 Ages Group</td>
</tr>
<tr>
<td>45-66 Ages Group</td>
</tr>
<tr>
<td>All Turkish Male Seafarers</td>
</tr>
<tr>
<td>Turkish Male Population</td>
</tr>
</tbody>
</table>
In the article, decimal fractions should be separated with dots and numbers should be separated with commas.

Average age: 28.624
Number of participants: 1,044 people
Page numbers, headers and footers should not be added to the study. The journal administration will make these adjustments.

Authors are deemed to have accepted that they have transferred the copyright of their studies to the journal by submitting their studies to our journal. Submitting a study to two different journals simultaneously is not suitable within the frame of academic ethics.

It is required that the studies are original and have not been published elsewhere before. If conference and symposium papers were published in a booklet, in this case, they should be published by JEMS on the condition that the copyright has not been transferred to the first publishing place. The information must be given to the journal editorship about where these kinds of papers were published before.

3. Types of Article

Editorial (ED)
This is an article which the editor prepares for determining journal policies in guiding research strategies and in making announcements to researchers and authors.

Letter to Editor (LE)
This is a short article grounding upon the objectivity criteria, which the editor addresses to make comments, criticism, and contribution on a previously written and published article. Letter to the editor is used to allow sharing of feedback on the articles published in JEMS. Title, Author, Letter, References (Maximum 6000 words, 15 pages).

Erratum (ER)
This is a notification for announcing corrections, errors and retracts regarding the articles that have been previously published in JEMS.

Original Research (AR)
This is an original research article that contains the findings that reached with the analysis of data obtained using specific methodologies within the context of the research model developed based on a literature review on a specific topic and contains the results which were obtained by the discussion of the findings and the literature (Maximum 6000 words, 15 pages).

Review (RE)
This is an article pertaining to the research compiled by summarizing researches and data which other authors and/or institutions previously carried out, (It cannot be accepted as an original research article) Title, Author, Abstract, Introduction, Literature Review, Conclusion, References (Maximum 6000 words, 15 pages).

Report (RP) Interview (RP)
This is an article pertaining to the short research using structured interview methods with a veteran, recognized with knowledge and expertise in a specific subject, to seek his/her advice in a predetermined topic concerning the maritime industry (Organized by the editor). Title, Author, Abstract, Short biography of the interviewee, Methodology, Questions and Comments, Results, Interview Permit Certificate (Maximum 3000 words).

Case Investigation (RP)
This is an article pertaining to short research prepared to unfold a problem determined during research concerning the maritime industry to offer a solution and develop a method for the solution. Title, Author, Abstract, Case, Problem and Solution Offers, Conclusion, References, Permission Letter (Maximum 2000 words).

Technical Report (RP)
This is an article pertaining to the short research containing the conclusions of analysis on relevant obtained data in matters concerning the maritime industry referenced upon a limited number of literature material. It covers conclusive reports of industrial research, particularly research reports carried out during the period of academic education, etc. Title, Author, Abstract, Introduction, Methodology, Results, References(Maximum 2000 words).

Book Review (BK)
This is an article where an invited reviewer evaluates a newly published book concerning the maritime industry in conformance with a specific methodology. (Maximum 1000 words).

Academic Perspective
This is an article in characteristics of a compilation or a plain text where veteran academicians who are recognized with their academic knowledge and expertise would share their contributions in maritime science, guide young academicians
and researchers, and offer solutions for the demands of the maritime industry. (Invited by the editor).

### Industrial Perspective

An article in conformance with a specified text format prepared by an expert as an invitee whose knowledge and experience related to their area of expertise is recognized as beneficial by the industry (Invited by the editor). Title, Author, Abstract, Foresight about the subject, Results (Maximum 6000 words, 15 pages).

### After the Meeting

This article is written to convey the impressions, congress conclusion reports, and information gathered during scientific conventions following a congress, conference, and symposium organized on such matters concerning the maritime industry. (Maximum 500 words).

### 5. References

The citation style used by our journal is Institute of Electrical and Electronics Engineers (IEEE) Reference Style.

The IEEE Style is used for publications in engineering, electronics, telecommunications, computer science and information technology.

IEEE Style uses a notational method of referencing when referring to a source of information within the text of a document.

You can achieve the IEEE reference style and all reference examples used in our journal at https://jemsjournal.org/guide-for-authors.
**JEMS Publication Ethics And Malpractice Statement**

Journal of ETA Maritime Science is an independent publication regarding scientific research, and the editor decides its publication policy. The statement signifies the ethical behaviour of the publisher, the editor, the reviewers and the authors. The ethics statement for JEMS is based on **COPE Code of Conduct and Best Practice Guidelines for Journal Editors and COPE Best Practice Guidelines for Journal Editors** available at www.publicationethics.org.

**A. Duties of Publisher:**

**Duties of the Publisher**

**Handling of unethical publishing behaviour**

The publisher will take all appropriate measures to modify the article in question, in close cooperation with the editors, in cases of alleged or proven scientific misconduct, fraudulent publication, or plagiarism. This includes the prompt publication of an erratum, disclosure, or retraction of the affected work in the most severe case. Together with the editors, the publisher will take reasonable steps to detect and prevent the publication of articles in which research misconduct occurs and will under no circumstances promote or knowingly allow such abuse to occur.

**Editorial Autonomy**

JEMS is committed to ensuring the autonomy of editorial decisions without influence from anyone or commercial partners.

**Intellectual Property and Copyright**

JEMS protects the property and copyright of the articles published in the journal and maintains each article's published version of the record. JEMS provides the integrity and transparency of each published article.

**Scientific Misconduct**

JEMS's publisher always takes all appropriate measures in respect to fraudulent publication or plagiarism.

**B. Duties of Editors:**

**Decision on Publication and Responsibility**

The editor of JEMS keeps under control everything in the journal and strives to meet the needs of readers and authors. The editor is also responsible for deciding which articles submitted to the journal should be published and may be guided by the policies subjected to legal requirements regarding libel, copyright infringement, and plagiarism. The editor might discuss with reviewers while making publication decisions. The editor is responsible for the contents and overall quality of the publication. Editor ought to provide a fair and appropriate peer-review process.

**Objectivity**

Articles that are submitted to the journal are always evaluated without any prejudice.

**Confidentiality**

The editor must not disclose any information about a submitted article to anyone other than editorial staff, reviewers, and publisher.

**Conflicts of Interest and Disclosure**

The Editor of JEMS does not allow any conflicts of interest between the parties such as authors, reviewers and editors. Unpublished materials in a submitted article must not be used by anyone without the express written assent of the author.

**Fundamental Errors in Published Works**

Authors are obliged to notify the journal's editors or publisher immediately and to cooperate with them to correct or retract the article if significant errors or inaccuracies are detected in the published work. If the editors or publisher learn from a third party that a published work contains a material error or inaccuracy, the authors must promptly correct or retract the article or provide the journal editors with evidence of the accuracy of the article.

**C. Duties of Reviewers:**

**Evaluation**

Reviewers evaluate manuscripts without origin, gender, sexual orientation or political philosophy of the authors. Reviewers also ensure a fair blind peer review of the submitted manuscripts for evaluation.

**Confidentiality**

All the information relative to submitted articles is kept confidential. The reviewers must not be discussed with others except if authorized by the editor.

**Disclosure and Conflict of Interest**

The reviewers have no conflict of interest regarding parties such as authors, funders, editors, etc.
Contribution to editor

Reviewers help the editor in making decisions and may also assist the author in improving the manuscript.

Objectivity

They always do the objective judgment evaluation. The reviewers express their views clearly with appropriate supporting arguments.

Acknowledgement of Sources

Reviewers ought to identify a relevant published study that the authors have not cited. Reviewers also call to the editor’s attention any substantial similarity or overlap between the manuscript and any other published paper of which they have personal knowledge.

D. Duties of Authors:

Reporting Standards

A submitted manuscript should be original, and the authors ensure that the manuscript has never been published previously in any journal. Data of the research ought to be represented literally in the article. A manuscript ought to include adequate detail and references to allow others to replicate the study.

Originality

The authors who want to submit their study to the journal must ensure that their study is entirely original. The words and sentences getting from the literature should be appropriately cited.

Multiple Publications

Authors should not submit the same study for publishing in any other journals. Simultaneous submission of the same study to more than one journal is unacceptable and constitutes unethical behaviour.

Acknowledgement of Sources

Convenient acknowledgement of the study of others has to be given. Authors ought to cite publications that have been efficient in determining the study. All of the sources that used the process of the study should be remarked.

Authorship of a Paper

Authorship of a paper ought to be limited to those who have made a noteworthy contribution to the study. If others have participated process of the research, they should be listed as contributors. Authorship also includes a corresponding author who is in communication with the editor of a journal. The corresponding author should ensure that all appropriate co-authors are included in a paper.

Disclosure and Conflicts of Interest

All sources of financial support should be disclosed. All authors ought to disclose a meaningful conflict of interest in the process of forming their study.
